Highlighted areas indicate most common offenses for each demographic group. Inmates often are committed to SCDC with many offenses, with each carrying a specific sentence, commitment, etc. To facilitate statistical reporting, SCDC determines a single "most serious offense" (MSO) for each inmate. Before August 2005, the offense with the longest determined MSO. Effective August 2005, inmates' MSO is the offense with the highest severity level (i.e. offenses are classified between severity level 1 and 5, with 5 as the highest). In cases where an inmate has multiple offenses at the same severity level, SCDC considers the category of each offense, where homicide offenses take precedence, followed by violent offenses. If multiple offenses exist within the same category, the offense with the longest sentence then determines MSO. While the new methodology better represents the definitional revision invalidates year to year comparisons and trend analysis of MSO distributions.

**New Crime categories added FY 1996.

Note: Percentages may not add up due to rounding.
